

Part 2 – Performance Analysis

Based on the PivotTable analysis, Email Marketing generated the highest total revenue among all marketing channels.

Row Labels	Sum of Revenue_CAD	Sum of Ad_Spend_CAD	Sum of Profit	Sum of ROI
Email	\$990,256.30	\$21,086.36	\$969,169.94	842914.73%
Google Ads	\$352,770.58	\$199,043.33	\$153,727.25	13409.87%
Facebook	\$196,960.22	\$133,458.36	\$63,501.86	10269.06%
LinkedIn	\$95,919.90	\$211,060.48	-\$115,140.58	-11264.55%
Instagram	\$93,958.24	\$129,982.64	-\$36,024.40	-5848.84%
Grand Total	\$1,729,865.24	\$694,631.17	\$1,035,234.07	849480.27%

This indicates that email campaigns were the most effective channel for generating sales during the campaign period.

Email Marketing also had the highest average return on investment (ROI). The average ROI for email campaigns was approximately, which is significantly higher than other channels. This means email campaigns delivered much higher returns than the amount spent on advertising.

Row Labels	Average of ROI
Email	4581.06%
Google Ads	71.33%
Facebook	48.90%
Instagram	-28.12%
LinkedIn	-53.64%
Grand Total	849.48%

When analyzing the cost per acquisition (CPA) by region, British Columbia had the highest average CPA. This means that it cost more money to acquire each customer in this region compared to others. Higher CPA values suggest that marketing efforts in British Columbia are less cost-efficient.

Row Labels	Average of CPA
BC	\$146.19
Ontario	\$135.78
Prairies	\$129.23
Quebec	\$123.79
Atlantic	\$117.57
Grand Total	\$130.95

Ontario appears to be the most profitable region overall. The total profit generated from campaigns in Ontario. This was higher than profits generated in other regions, indicating that marketing activities in Ontario were more successful in generating returns.

Row Labels	Sum of Profit
Ontario	\$255,513.88
Prairies	\$226,761.77
Quebec	\$203,281.32
BC	\$196,485.54
Atlantic	\$153,191.56
Grand Total	\$1,035,234.07

Among the different marketing objectives, Retargeting performed the best. Retargeting campaigns had a higher average ROI than both Prospecting campaigns and Brand Awareness campaigns. This suggests that targeting users who have already interacted with the brand tends to produce better financial results.

Row Labels	Sum of Revenue_CAD	Sum of Profit	Sum of Ad_Spend_CAD	Average of ROI
Retargeting	\$763,747.03	\$521,499.34	\$242,247.69	1131.74%
Prospecting	\$798,769.35	\$454,363.40	\$344,405.95	800.51%
Brand Awareness	\$167,348.86	\$59,371.33	\$107,977.53	528.60%
Grand Total	\$1,729,865.24	\$1,035,234.07	\$694,631.17	849.48%

The top five campaigns by total profit. These campaigns were the strongest performers in terms of profitability.

Row Labels	Sum of Profit	Sum of Ad_Spend_CAD	Sum of Revenue_CAD
Email - Winback	\$283,053.77	\$5,855.16	\$288,908.93
Email - Abandoned Cart	\$259,515.44	\$5,821.86	\$265,337.30
Email - Newsletter	\$230,981.99	\$5,328.10	\$236,310.09
Email - Product Drop	\$195,618.74	\$4,081.24	\$199,699.98
Search - Brand	\$44,874.84	\$47,861.10	\$92,735.94
Display - Remarketing	\$43,763.90	\$56,773.50	\$100,537.40
Search - Generic	\$38,887.26	\$46,451.13	\$85,338.39
Shopping - Top Sellers	\$26,201.25	\$47,957.60	\$74,158.85
FB Carousel - Catalog	\$19,816.55	\$29,974.49	\$49,791.04
FB Video - Brand	\$18,176.46	\$30,639.60	\$48,816.06
FB Feed - Promo	\$13,914.86	\$38,610.52	\$52,525.38
FB Remarketing	\$11,593.99	\$34,233.75	\$45,827.74
IG Influencer Boost	-\$7,737.87	\$27,233.94	\$19,496.07
IG Reels - Winter	-\$9,117.06	\$31,643.09	\$22,526.03
IG Feed - Promo	-\$9,407.80	\$35,593.20	\$26,185.40
IG Stories - New Arrivals	-\$9,761.67	\$35,512.41	\$25,750.74
LI Retargeting	-\$17,621.46	\$41,782.05	\$24,160.59
LI Lead Gen	-\$26,953.88	\$50,300.16	\$23,346.28
LI Brand Thought	-\$32,666.00	\$53,684.55	\$21,018.55
LI Sponsored Content	-\$37,899.24	\$65,293.72	\$27,394.48
Grand Total	\$1,035,234.07	\$694,631.17	\$1,729,865.24

The analysis also identified several campaigns with consistently negative ROI Negative ROI means that the campaign costs more to run than the revenue it generated. These campaigns may need to be paused, optimized, or removed from future marketing strategies.

Row Labels	Average of ROI	Sum of Revenue_CAD	Sum of Ad_Spend_CAD
IG Feed - Promo	-25.97%	\$26,185.40	\$35,593.20
IG Reels - Winter	-27.75%	\$22,526.03	\$31,643.09
IG Stories - New Arrivals	-29.39%	\$25,750.74	\$35,512.41
IG Influencer Boost	-29.82%	\$19,496.07	\$27,233.94
LI Retargeting	-44.56%	\$24,160.59	\$41,782.05
LI Lead Gen	-54.11%	\$23,346.28	\$50,300.16
LI Brand Thought	-56.30%	\$21,018.55	\$53,684.55
LI Sponsored Content	-56.97%	\$27,394.48	\$65,293.72
Grand Total	-40.94%	\$189,878.14	\$341,043.12

Part 3 – Budget Reallocation Strategy

Based on the campaign performance analysis, a revised marketing budget of \$250,000 is recommended. A larger portion of the budget should be allocated to channels that generated the highest revenue and ROI.

Email Marketing should receive the largest share of the budget at \$100,000 because it generated the highest revenue and the strongest ROI. Google Ads should receive \$75,000 since it also performed well in terms of revenue and profitability. Facebook should receive \$50,000 because it produced moderate but stable results. Instagram should receive \$15,000, and LinkedIn should receive \$10,000 since their performance was lower compared to the other channels.

The marketing objectives should also focus more heavily on Retargeting campaigns because they showed the strongest return on investment. Prospecting campaigns can continue, but with moderate spending, while Brand Awareness campaigns should receive a smaller portion of the budget because they generally produce lower immediate returns.

Although focusing on high-performing channels can improve profitability, there are potential risks with this strategy. Relying too heavily on one or two channels could reduce diversification in the marketing mix. If performance changes or audience engagement declines on those platforms, the overall campaign results could be negatively affected. For this reason, it is important to maintain a budget across multiple channels to reduce risk.

Part 4 - Executive Summary

To: Senior Management, Newfoundland Puffins Inc.

This report evaluates the performance of recent digital marketing campaigns using key performance indicators such as revenue, profit, return on investment (ROI), and cost per acquisition (CPA). The analysis was conducted using Excel PivotTables to compare results across marketing channels, campaign objectives, and geographic regions. The goal of this analysis is to identify the most effective marketing strategies and provide recommendations for improving the allocation of the company's marketing budget.

The analysis shows that **Email Marketing** is the **strongest-performing channel overall**. It generated the highest total revenue and also delivered the highest average return on investment compared with the other channels. These results suggest that email campaigns are highly efficient at converting potential customers into sales while requiring relatively low marketing costs. Google Ads also performed well, producing strong revenue and solid profitability. Facebook delivered moderate results but still contributed meaningful revenue to the overall campaign performance.

In contrast, **Instagram and LinkedIn** were the **weakest-performing channels in the dataset**. These platforms generated lower revenue and weaker overall returns compared with the other channels. While they may still provide value for brand visibility and audience engagement, the financial performance suggests that they are currently less effective for driving direct sales and profit.

The regional analysis indicates that **Ontario** is the **most profitable market for the company's campaigns**. This region generated the highest total profit, suggesting that marketing efforts in Ontario are particularly effective. However, the data also shows that **British Columbia** has the highest cost per acquisition, meaning that it is more expensive to convert customers in that region. This suggests that marketing strategies in British Columbia may require adjustments to improve efficiency.

When comparing campaign objectives, Retargeting campaigns performed the best overall. These campaigns produced the highest average ROI, indicating that targeting users who have already interacted with the brand is a highly effective strategy. Prospecting campaigns remain important for reaching new audiences, but they generally produce lower returns. Brand Awareness campaigns showed the weakest financial performance, likely because their primary goal is visibility rather than immediate sales.

Based on these findings, a revised marketing budget allocation of \$250,000 is recommended. A larger share of the budget should be directed toward the most effective channels. Email Marketing should receive the largest allocation due to its strong revenue generation and exceptionally high ROI. Google Ads should also receive a significant portion of the budget since it consistently delivers strong performance. Facebook should continue to receive moderate investment because it provides stable results and supports audience engagement. Smaller allocations should be directed toward Instagram and LinkedIn since their performance was comparatively weaker.

In addition to channel allocation, marketing strategies should prioritize Retargeting campaigns because they have demonstrated the strongest financial return. Prospecting campaigns should continue to be used to expand the customer base, but spending should be controlled to ensure efficiency. Brand Awareness campaigns may still be valuable for long-term brand development, but they should receive a smaller portion of the budget compared with performance-driven objectives.

While focusing on high-performing channels can significantly improve profitability, there are also risks associated with concentrating the marketing budget too heavily in a limited number of platforms. Market conditions, audience behaviour, or algorithm changes on digital platforms could impact performance over time. For this reason, maintaining some level of diversification across multiple marketing channels is recommended to reduce risk and maintain stability in overall campaign performance.

Overall, the analysis demonstrates that data-driven marketing decisions can significantly improve the effectiveness of the company's advertising strategy. By prioritizing the highest performing channels and campaign objectives while maintaining balanced risk management, Newfoundland Puffins Inc. can maximize the return on its marketing investments and support sustainable growth in future campaigns.
